

diamonds are a **stone** floor's best friend

GLOMESH
diamond
Stone Floor Diamond Pads

**diamond pads made with traditional
diamond abrasives**

But

- Glomesh Diamond abrasives impregnate the pad. NOT just surface coated.
- Available in a wide choice of five grits.
- Glomesh Diamond has wear indicators to tell you when to change pads.
- Environmentally friendly. Glomesh Diamond uses no harsh chemicals.
- So cost effective. Use Glomesh Diamond to save up to \$10 per sqm per year.

*there is a
difference*

GLOMESH **diamond**

Stone Floor Diamond Pads

- **Diamond abrasives impregnate the pad.** Unlike any other diamond pad, Glomesh Diamond is not just surface coated; rather the diamond penetrates the pad. That means longer effective life.
- **Available in a choice of five grits.** This means the right combination for the right job. Unlike other diamond pads Glomesh Diamond has a 6,000 grit pad for an even more supergloss. And a 400 grit for more severely worn floors.
- **Has wear indicators.**
Three dots on the working side.
Wear the working surface down until the wear indicators fully disappear.
- **Environmentally friendly:**
Glomesh Diamond does its job fantastically with just a little water NO polish, no strippers, no harsh chemicals at all.
- **So cost effective:** save over 40% of cost versus polished floors. Save as much as \$10,000 per 1000 sq m per annum versus stone floors that have a superficial polish applied. Plus a constant gloss level. No gloss roller-coaster.

Wear indicators on working side of pad.

*Major maintenance – strip/seal or cutback/reapply – is required, on average, at 12 week intervals. The period may vary depending on traffic, wear and required standards.
